I need to run the command in a script and pipe it to another command and i'm receiving an error "Syntax error: unknown option". Here's the command: vSphere Hypervisor esxi 6.0.0u3-5050593 iso (2017) pc \$release This is my attempt: vSphere Hypervisor esxi 6.0.0u3-5050593 iso (2017) pc "\$release" I tried adding a + or %20, no success. A: You can use the following: This is working with my ESXi 6.5 build (from VMware). Just to mention that if you are using a variable containing spaces, you should probably use the following: vSphere Hypervisor esxi 6.0.0u3-5050593 iso (2017) pc "\${release}" WHY MEXICO WON'T GET WHEAT: I have been following the story of the Kuzco fields in Mexico very closely. I have written some articles,

some of which will appear here. My goal is to provide a clear understanding of this important story to all who have an interest in it. What follows is a report on the situation with respect to wheat last week in Mexico. THE MEXICAN GOVERNMENT TOLD WINNERS OF PUBLIC LOTTERY THAT THEIR WINNINGS MUST BE PAYABLE TO THE GOVERNMENT. THE GOVERNMENT WOULD THEN SELL THE MONEY BACK TO THE WINNERS. WINNERS WERE GRANTED 1.7 BILLION MEXICAN DOLARS. The Mexican government apparently feels that in addition to the payment of the amount of the lottery win, the government must be compensated for the loss of its future wheat revenues as well. The government is currently in a financial crisis and desperately needs money. The government decided to “buy back” these lottery winnings, the loss of which would cause economic harm to the government and to all those people who depend on wheat for their own nutrition. To “buy back” the lottery winnings, the government will use money that would have been spent on wheat 82157476af
